

CALL US TODAY!

Developed by LG Pike, the OffTrack *Undercutter* is the strongest and most efficient product on the undercutting market today!

Our *Undercutter* provides a way of undercutting without wasting valuable track time.

Operating as an attachment from an excavator, it allows for undercutting from an off track location, while keeping the trains moving.

to get more information on the Patent Pending Offtrack *Undercutter* or any of our other railway maintenance products that we have available.
